WORK EXPERIENCE

Cloud Engineering Intern | HEPro AI — Nov 2025 – Jan 2026

- Deployed an asynchronous serverless application on AWS utilizing **AWS Lambda**, **API Gateway**, **DynamoDB**, and **S3**.
- Engineered high-throughput **RESTful API endpoints** in Python maintaining sub-180ms p95 latency with **AWS IAM least-privilege**.
- Configured **Amazon CloudWatch** metrics, structured log streams, and threshold alarms, reducing incident triage time by 45%.

Cloud Computing Trainee | Oracle Academy & Oracle University — May 2025 – Aug 2025

- Completed enterprise cloud curriculum covering **Oracle Cloud Infrastructure (OCI)** compute shapes, Virtual Cloud Networks (VCN), storage, and multicloud peering; earned **2 professional Oracle cloud certifications**.

FEATURED ENGINEERING PROJECTS

CloudOps-AI – Cloud Operations Platform — Code Repo →

Python, FastAPI, AWS STS, Docker, Pytest, Prometheus, GitHub Actions

- Engineered an autonomous multi-tenant cloud operations console providing cross-account AWS discovery via per-tenant **STS AssumeRole** and automated **Amazon S3 / EC2** security-posture audits.
- Integrated dry-run execution planners, hash-chained audit trails, and automated rollback safeguards; automated testing with a 2,000+ test suite in **pytest** and non-root Docker builds via **GitHub Actions CI/CD**.

CloudForge – Mini Platform as a Service (PaaS) — Code Repo →

FastAPI, Docker Engine, MySQL, SQLAlchemy, JWT Auth, Bash

- Built a Render-inspired lightweight PaaS that automates Git repository cloning, Dockerfile compilation, and container runtime orchestration, cutting manual developer deployment overhead by 70%.
- Implemented multi-tenant **JWT authentication** with bcrypt hashing, live build log streaming, and MySQL persistence.

End-to-End DevOps CI/CD Pipeline — Code Repo →

Node.js, Express, GitHub Actions, Docker Hub, Render, Jest

- Built an automated production delivery pipeline: containerized Node.js services with multi-stage Docker builds, pushed versioned images to **Docker Hub** via repo secrets, and automated release webhooks to **Render**.

HACKATHONS & COMPETITIVE ENGINEERING

- **AI Crowd Management (Kumbhathon Finalist):** Trained **YOLO & PyTorch** on 5,000+ images for real-time crowd surge prevention.
- **Cycra Health (GDG Pune Hackathon)** (Retrospective): Built longitudinal health intelligence platform with **React & Supabase**.
- **Smart India Hackathon (SIH):** Participant in **SIH 2024 & 2025** (36-hr rapid prototyping sprint); Volunteer for **SIH 2026**.
